ABOUT ME

I am a vocational high school student majoring in Information Systems, Networks, and Applications with a strong interest in Web Development, Backend Development, and Cloud Computing. Experienced in building web applications using Laravel, Next.js, PHP, and PostgreSQL, as well as deploying applications with Docker and GitHub Actions. I am eager to learn new technologies, solve real-world problems, and contribute to developing reliable and scalable software solutions.

EDUCATION

2022 - 2024

Boarding School

MTs Darul Hikmah Tulungagung

Contributed as a Multimedia Staff in OPPM by managing event documentation, designing digital promotional materials, and producing visual content to support communication and publication activities in the boarding school.

2024 - Now

Information Systems,
Networks, and Applications

SMK Telkom Sidoarjo

Currently pursuing vocational education in Information Systems, Networks, and Applications, with a focus on web development, backend development, networking, cloud computing, and system administration. Gained hands-on experience through academic projects involving Laravel, Next.js, PostgreSQL, Docker, Linux, and CI/CD practices.

EXPERIENCE

2026

PT. Data Inti Prima

Backend Developer

Developed and maintained backend applications using Laravel and PostgreSQL, built RESTful APIs, optimized database performance, and collaborated with frontend developers to deliver reliable web applications.

2025 - Now

Elevra Digital Era

Fullstack Developer

Developed and maintained full-stack web applications using modern technologies, integrating responsive frontend interfaces with scalable backend services and databases.

SKILLS

- Php & Laravel
- React.Js & Next.Js
- PostgreSQL
- Docker
- Linux
- CI/CD
- RestAPI
- Git & Github

PROJECT

Website Desa Sawotratap

Developed a village administration website using Laravel and MySQL, featuring digital public services, information management, and an administrative dashboard for efficient data management.

Website Posyandu Sedap Malam

Developed a responsive Posyandu management system using Next.js and PostgreSQL, enabling digital health record management and real-time access to maternal and child healthcare information.
